

Fiat® Key Programming Software ADS231 - CodeD746536AD

Smart Dongle and Smart Aerial compatible

November 2015

Advanced Diagnostics are pleased to announce the release of Fiat® 2015 (ADS231) software for Fiat®, Alfa® and Lancia® vehicles worldwide.

What does the software do?

ADS231 key programming software now includes pincode reading and pre-coding for the Fiat® 500L and various other manufacturers.

For an improved, time saving and streamlined procedure, pre-coding can be performed seamlessly in the background using Smart Aerial and Smart Dongle, enabling the locksmith to pre-code a blank transponder and without having to switch to another device or tool. Customers that have not purchased Smart Aerial have the option of using the Silca cloning devices and the Power Cable (ADC243) for pre-coding.

Customers that have not purchased Smart Aerial have the option of using the Silca cloning devices and the Power Cable (ADC243) for pre-coding.

What software and products will I need to program / pre-code keys for Fiat® group vehicles?

- Fiat® 2012 - ADS185 Software
- Smart Dongle and Smart Aerial or Smart Dongle, RW4 Plus/Fast Copy Plus and Power Cable (ADC243)
- Programming devices

Nota: without Smart Dongle, only pincode reading is available. For MVP Pro users: one token will be deducted.

Contact your distributor to buy Smart Aerial and ADS231 software now.

DETAILS OFFER
