FREE Software Update for Ford®
ADS100 (SOUTH AMERICA)
Code D745306AD

December 2015

Advanced Diagnostics are pleased to announce the release of a free software update for Ford® ADS100 key programming software. ADS100 now includes two additional Ford® vehicles found in South America.

What does the software update do?

The ADS100 update applies to the South American market for the Ford® vehicles listed in the application list below.

The key programming procedure is a timed access operation that takes 10 minutes to complete and does not require a pin code. This software allows keys to be added or programmed from a lost key situation.

The remote programming is performed manually as part of the procedure when using ADS100. This remote procedure can be seen on Info Quest via the AD website or the IQ mobile app.

What other software and products will I need?

MVP PRO / AD100 PRO

ADS100 SOFTWARE

Contact your distributor to buy ADS100 software now.
