Volvo® Key Programming Software
ADS2261 - Code D751959AD

June 2018

Advanced Diagnostics is pleased to announce the release of Volvo® ADS2261 key programming software for a range of Volvo® vehicles worldwide from 2010 onwards for the Smart Pro only.

What does the software do?

ADS2261 software will program slot type keys only for various Volvo® models. This software features pincode reading, which is automatically stored on the tester for use during the key programming process. With the exception of the V40, the pincode reading procedure can take up to 5 hrs to complete.

The Smart Pro should remain connected to the vehicle during the entire process and due to the extended connection time, we strongly recommend using a battery support unit to maintain a stable battery voltage. The pincode reading can be paused anytime during the procedure and can be resumed when required. No working key is required.

Please see the application list below for vehicle coverage or on Info Quest.

Note: This software does not enable proximity key functionality. Refer to Smart Pro hints and tips for more details.

What else will I need?

Smart Pro only

Contact your distributor to buy ADS2261 software now.

OFFER DETAILS	
OBD Master Cable	ADC2000
Smart Aerial required	No
Software category	A
Other accessories required	Battery support unit - 50Ah / 12.5V

Software Applications
