

## SILCA TRIAX ENGRAVING – MARKER2000PROGRAM

Silca offers 2 solutions for engraving or marking data on the key head or stem:

### SILCA TRIAX ENGRAVING:

1. Engraving by TRIAX (all models); the operation is performed with the special cutting tool provided. Silca Key Programs integrates an engraving model editor called TRIAX ENGRAVING.

### MARKER2000PROGRAM

2. Percussion marking by MARKER; Silca supplies a special program called MARKER 2000 Program with which to construct and test marking models for keys and cylinders. The models created by Marker 2000 can also be used through Silca Key Programs.
