

SILCA KEY PROGRAM MAIN FUNTIONS

- **CUSTOMER HISTORIC ARCHIVE:** list of customers to which the information regarding the copied key can be connected, comprising cutting, electronic code and an image of the cuts read by OPTIKA.
- **JOB QUEUE:** to organize key-cutting activities in your shop.
- **MANAGEMENT OF CUTTING CARDS/FAVOURITE OR MOST OFTEN USED SERIES**
- **PROGRAM CUSTOMIZATION:**
 - Addition of new key blanks, marks and comparatives to the wealth of information in the Silca database
 - Addition of a USER SERIES with relative table of indirect codes in the customer's possession
 - Definition of a stock of keys with their position on the display unit (hook)
- **FUNCTION FOR SAVING AND RESTORING USER DATA** (data backup and restore).
- **FUNCTION FOR RESTRICTING USE OF THE PROGRAM** by staff, through access with login/password and different privileges.
- **SKP NEWS DOCUMENT** to inform users about all the new items available with updates.
- **CODEPROGRAM, TRIAX/QUATTROCODE, PRIMA LASER/IDEA NEWS DOCUMENTS** with lists of new lock systems.
- **UPDATED MANUALS IN PDF FORMAT** for all the electronic key-cutting machines recorded by the customer in the special list of machines.
- **FUNCTION FOR UPDATING THE PROGRAM** from the **SILCA WEB** site, with a PC connected to the internet or off-line (it's enough to have one PC connected to the internet).
