

New Software Update Key Programming for Chrysler® 2018 ADS2272 - Code D753301AD

August 2019

Advanced Diagnostics is pleased to announce the release of a new update for Chrysler® 2018 ADS2272 key programming software.

What does the software do?

ADS2272 software allows proximity keys to be added, or programmed from a lost key situation and has been designed to bypass the pin-code automatically in the background or to read the pin (varies for each system) making it a seamless process when programming keys or a very simple two-step process of reading the pincode and then programming the key/s.

The connection to the vehicle is made using the ADC2012 cable, which connects directly to the RFH unit located in the vehicle (locations may vary between models).

Please see the application list below or the Info Quest for vehicle coverage.

Note: This software is available for Smart Pro only. No working key is required.

What else will I need?

Smart Pro

**ADC2012
(Code D753920AD)**

OFFER DETAILS

Cable	ADC2000A
Smart Aerial required	No
Software category	A
Other accessories required	ADC2012
