

**SILCA CODE PROGRAM for UC199/299/399/399EVO and UNOCODE PRO**

Data update with 4 new cutting cards.

**IMPORTANT**

- **UNOCODE PRO: problem solved in "PC queue" when a number of passages are used to cut the key.**

**■ New items include:**

- |                |                        |
|----------------|------------------------|
| ✓ Huwil        | ✓ Renault              |
| ✓ M&C (Matrix) | ✓ Schlage (AUB system) |

**Update the software on: UC199/UC299/UC399/UC399 EVO/UNOCODE PRO**

**SILCA QUATTROCODE – TRIAX PROGRAM**

Data update with 28 new series.

**IMPORTANT**

- 1) A new **R30 clamp** that can house TRIAX PRO and FUTURA removable jaws has been introduced for the **QUATTROCODE and TRIAX-e.code key-cutting machines**. The R30 clamp is necessary only for the new lock systems developed by SILCA with new jaws.  
All existing options for QUATTROCODE and TRIAX-e.code will not be replaced by removable jaws for the R30 clamp.
- 2) A **R30 clamp** that can house Triax PRO removable jaws has been introduced for the **TRIAX QUATTRO key-cutting machine**. All lock systems developed on the removable jaws of TRIAX PRO can also be used with the R30 clamp on the TRIAX QUATTRO.
- 3) **To use the R30 clamp with the TRIAX-e.code, TRIAX 2 and TRIAX QUATTRO key-cutting machines**, replace the U102TT and U103TT tracers on the Tracer Tower with a single 04TT tracer. The necessary instructions are included in the box of the optional R30 clamp (D746897ZB)
- 4) **TRIAX PRO**: all lock systems that can be used with the standard R29-01J-02J clamp have been implemented.
- 5) **TRIAX-e.code e TRIAX 2: the machine memory is full.**

This update implements all the lock systems already available on the QUATTROCODE, TRIAX QUATTRO and TRIAX PRO key-cutting machines. These systems and the new ones to be developed by Silca will be included **ONLY** in Silca Key Programs and not incorporated into the machines. Therefore, Silca Key Programs is necessary to use the new systems with the **TRIAX-e.code and TRIAX 2 key-cutting machines**.
