

## Software Update for Mitsubishi® ADS2281 - Code D753494AD

December 2019

**Advanced Diagnostics is pleased to announce the release of a new software update for Mitsubishi® ADS2281.**

### What does the software do?

This software programs bladed and proximity keys for several Mitsubishi® models. For models like the Outlander this is a **FIRST TO MARKET SOLUTION** for key programming in an all keys lost situation.

All keys will be erased before programming. There is an add key option if you wish to add one additional key / remote to an existing key. The security is bypassed for a seamless programming procedure.

**Note: The Smart Aerial ADC242 is needed when there are no working proximity keys.**

### What else will I need?

Smart Pro

Smart Aerial

### OFFER DETAILS

|                       |   |
|-----------------------|---|
| Cable                 | ADC2000   |
| Smart Aerial required | Yes, when no working proximity key is available |
