

**SILCA KEY PROGRAMS PRO****■ Version 1 of the Silca Key Programs PRO**

For technical reasons the SKP program has been revised and now has a new database engine called Microsoft SQL Server, which improves compatibility with recent Windows® Operating Systems.

The name of the new SKP program is SILCA KEY PROGRAMS PRO.

As a result of this revision, only the SKP PRO program will be updated with new functions and lock systems, and in future the SKP program will not be refreshed or updated.

ALL those who have subscribed in 2019 will be provided with the SKP PRO program on DVD.

SKP and SKP PRO programs can be together on the same PC because each one has distinct installation. The user can therefore access both programs during the transition stage from SKP to the new SKP PRO.

Once you have installed SKP PRO you will be able to:

- Import all user data from the SKP program installed on the same PC
- Import a backup file (.bcp) for SKP user data, so long as it is generated by a version of SKP equal to or later than 20.1.0.54

When you are sure that SKP PRO has imported all the SKP user data and is working properly, Silca suggests uninstalling SKP to avoid confusing the two programs.

■ Minimum installation requirements

Operating Systems:

- Windows® 7 (32 or 64 bit),
- Windows® 8 (32 or 64 bit),
- Windows® 10 (32 or 64 bit)

5 GB of free disk space

We advise at least 4 GB of RAM
