# FREE Software Update for Toyota® Keys
Toyota® Smart Reset (NORTH AMERICA)
ADS199 - Code D745365AD

January 2016

Advanced Diagnostics are pleased to announce the release of a free update for Toyota® 2013 ADS199 software for Toyota® vehicles with a bladed G or H key in North America.

What does the software update do?

When ADS199 is used with the Smart Dongle, the 16 minute reset time is virtually eliminated. The new procedure is nearly instantaneous. Any Toyota® vehicle fitted with immobilizer type5 or type6 and a bladed key type that is listed in the "ADUSA key look up guide" is supported. For further details refer to the InfoQuest database.

Time is money and the new Toyota® Smart Reset cuts Toyota® G or H key system lost key jobs down to seconds now that the 16 minute wait time has been bypassed by our Advanced Smart Technology.

Only available on BETA 12.34

Note: Without the Smart Dongle the key programming wait time remains at 16 minutes.

Toyota® G or H keys can be rapidly identified thanks to the letter engraved on the blade.

What other software and products will I need?

MVP PRO / AD100 PRO   **ADS199 SOFTWARE**   **SMART DONGLE**

Contact your distributor to buy ADS199 software now.
