New Software Release Mazda® 2017
ADS267 - Code D751335AD

November 2017

Advanced Diagnostics is pleased to announce the release of Mazda® ADS267 key programming software covering various Mazda® models from 2017 onwards worldwide.

What does the software do?

ADS267 software programs proximity keys for selected Mazda® vehicles with push button start. This software allows keys to be added or programmed from a lost key situation. The software has been designed to bypass the pincode automatically in the background, making it a seamless process when programming keys.

The remote fob programming is performed automatically as part of the procedure when using ADS267.

What other software and products will I need?

MVP PRO / AD100 PRO

SMART DONGLE

Contact your distributor to buy ADS267 software now.

OFFER DETAILS

* Compatible key profile. Please note that the key can be used only as security blade - not for vehicle ignition.

Important Note: To Prevent damage to the Smart Dongle, ensure that the ignition is turned off when connecting the tester to the vehicle.
